ALIREZA FORGHANI TOOSI

Unity Game & Application Developer

@ alirezaft98@gmail.com Mashhad, Razavi Khorasan, Iran alirezaft alirezaft

Computer Engineering graduate with 5+ years of experience in mobile game development using Unity and C#. Proficient in designing and developing hyper-casual, casual, and hybrid-casual games for the global market. Experienced in shipping and maintaining titles with up to 50M+ active users. Dedicated, continuous learner, and passionate about crafting engaging video games.

WORK EXPERIENCE

Mid-Level Unity Developer

Manshoor Fanavari Arya

Sep 2026 – Present Mashhad, Iran

- **Developed and delivered 4+ Virtual Reality (VR) projects** and interactive applications using the Unity engine.
- **Extended capabilities of proprietary internal tools** utilized across production pipelines.
- **Leveraged LLMs and Agentic software development** workflows to **boost team productivity by 1.5x**.
- **Communicated proactively with cross-functional teams and management** to consistently ensure on-time delivery.

Game Developer & Designer

Unbound Game Studio

Jul 2021 – Sep 2026 Remote

- **Implemented core gameplay mechanics for 10+ hyper-casual, casual, and hybrid-casual titles** using Unity and C# for global markets, adhering to Clean Code, Design Patterns, and scalable architecture.
- **Developed custom Unity editor tools** for level design and economy balancing, streamlining designer iteration workflows and **reducing production time by 10%**.
- Debugged and profiled live titles, **cutting crash/ANR rates by 30% and improving player retention by 5.1%**.
- **Ported Android Unity titles to WebGL** and wrote custom JavaScript integration wrappers for browser-specific feature support, **capturing 20K+ new players**.
- **Integrated ad networks and analytics SDKs** (GameAnalytics, Firebase, AppLovin, CrazyGames) across Android and WebGL games.
- Refactored legacy codebases and extracted technical & game design documentation, **decreasing engineering and design task turnaround times by 30%**.
- **Collaborated closely with game designers**, bridging technical and design disciplines through dual-domain expertise to accelerate iteration speed and shorten meetings.
- **Collected and analyzed in-game telemetry data** to drive game design decisions, identify drop-off funnels, and **reduce player churn by 10%**.
- **Authored Game Design Documents (GDD) and user stories** for mechanics and updates, ensuring smooth handoff to engineering.
- Interviewed 3 technical and design candidates, **onboarded and mentored new hires**, and evaluated performance against team conventions.

Co-founder, Programmer & Game Designer

Lodaroon Game Studio

May 2020 – Mar 2021 Mashhad, Iran

- Managed and scheduled project roadmaps to deliver high-quality releases within deadlines.
- Architected and implemented game mechanics using a **modular architecture based on ScriptableObjects** in Unity.
- Designed and documented mobile game concepts and mechanics, utilizing prototyping tools for seamless team communication.

SKILLS

- Unity
- C#
- Git
- GameAnalytics
- Agile & Scrum Development
- Software Engineering
- Mobile Game Development
- Game Design
- Data Analysis

SOFT SKILLS

- Quick Learner
- Effective Team Communication
- Problem Solving
- Teaching & Mentoring

EDUCATION

B.Sc. in Computer Engineering (Software Engineering & Computer Networks)

Ferdowsi University of Mashhad

Sep 2016 – Sep 2021

RELEVANT SKILLS

- **Unity:** Deep knowledge of the Unity engine for full-cycle game development, custom editor tooling, and engine extensions. Up-to-date with modern tech stack including **UI Toolkit, ECS, and Job System**.
- **C#:** Strong mastery of modern C# features, OOP, data-oriented paradigms, and performance optimization for scalable game architectures.
- **Software Engineering:** Thorough understanding of **Clean Code, Clean Architecture, Design Patterns, and SOLID** principles ensuring maintainable, modular, and testable codebases.
- **Git:** Proficient with Git version control, branching workflows, and team collaboration via CLI and GUI tools (**SourceTree, SmartGit**).
- **Mobile Game Development:** In-depth expertise in end-to-end mobile production, Agile/Scrum workflows, and leading mobile SDKs to ship polished titles on schedule.
- **Mobile Game Design:** Skilled in core loop design, in-game economy balancing, and monetization models (IAA & IAP), along with authoring detailed GDDs.
- **Data Analysis:** Proficient in leveraging **GameAnalytics** and telemetry data to analyze player behavior, identify churn funnels, and optimize retention.

PUBLISHED GAMES

- **Mr. Bean – Special Delivery:** Official Mr. Bean IP mobile title with **50M+ downloads**. Responsible for game design, legacy code audit and documentation, level design, and developing custom Unity tools. Google Play
- **Mr Bean – Solitaire Adventure:** Official Mr. Bean puzzle card game with **50K+ active users**. Responsible for level design, puzzle balancing, and difficulty progression. Google Play
- **Kingdom Hero: Tower Defense TD:** Designed game mechanics and implemented core gameplay systems using Unity and C#. Google Play

PROJECTS & ACTIVITIES

- **A Simple Diagnosis:** Solo-developed indie title focusing on UI/UX, audio architecture, and sound implementation. Available on itch.io.
- **Prefab Palette:** Open-source Unity editor utility built with UI Toolkit (**23 GitHub stars**), utilized by level designers in production. Available on GitHub.
- **Unity Verlet Rope:** Open-source Verlet integration rope physics simulation for Unity (**65+ GitHub stars**). Available on GitHub.
- **Technical Writing on Medium:** Authoring English articles on game development insights, technical post-mortems, and game design breakdowns. Available on Medium.
- **Workshops & Teaching:** Instructed game design and Unity workshops at Ferdowsi University of Mashhad; served as TA for Computer Lab courses and built a Kinect-powered interactive game to teach computer vision and game development.
